CoreHW

Comprehensive IC design and ASIC services

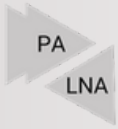

CoreHW is a leading fabless semiconductor company based in Finland, recognized for its world-class engineering expertise and comprehensive IC design services.

The company specializes in **RF, mmW, analog, mixed-signal, digital, and antenna technologies**, with proficiency in innovative IC technologies, including **RF Front-End, Transceivers, mmW Radar, Photonics, Data Converters, Power Management**, and **advanced Antenna designs**.

Over 300 Silicon-Proven IPs

- faster time-to-market
- lower costs compared to full in-house design
- reduced project risk

RF Transceiver and RF Front End ICs

Power Management ICs

Analog and Digital Mixed-Signal ICs

Frequency Synthesizers

Advanced IC design and Turnkey ASIC solutions

CoreHW specializes in delivering customized ASIC solutions for advanced applications, offering high-performance, energy-efficient designs. With a focus on integration and optimization, we ensure precise execution from initial concept to final product delivery.
